### ▣ High-altitude Operation Performance ▣

Max working height(mm)	18
Rated platform load (Kg)	200
Effective lifting weight (Kg)	1000

### ▣ High-altitude Operation Truck Functions ▣

High-altitude operation truck is one kind of special purpose vehicle which transport the workers and tools to aerial work. Equipped operational device both on the working platform and rotary seat, It can be remote control engine start / stop, high / low speed. Using the electro-hydraulic proportional valve to control lifting arm is good stability. The lifting arm can 360 ° continuously rotate. Through the link mechanism to make job groove level, steerable emergency pump fell job groove when the main pump fails, with night lighting, can lift heavy objects. The outrigger can separate and adjustable, to achieve vehicle leveling on uneven road. It is widely used in electricity, street lighting, municipal, landscape, communications, airports, making (repair) ship, transportation, advertising, photography and other aerial work areas.
