

JAC 5T Compress Garbage truck

| Main Specification | | | |
|--------------------------------|--|-------------------------------|-------------------------------|
| Product name | HTW5080ZYSJH compress garbage truck | | |
| Gross weight(Kg) | 8280 | Tank volume(m3) | 8 |
| Rate weight(Kg) | 2285,2085,1935 | oversize(mm) | 6950,7200,7350,7050×2280×2680 |
| Curb weight(Kg) | 5800,6000,6150 | Cabinet size(mm) | ×× |
| Cabin seat (people) | 3 | Utilization factor of payload | |
| approaching/departure angle(°) | 24/13 | front/rear hang(mm) | 1085/2050,1110/2025 |
| axle | 2 | wheelbase(mm) | 3815 |
| Axle weight(Kg) | 3000/5280 | Max speed (Km/h) | 100 |
| Chassis specification | | | |
| Chassis model | HFC1081P91K1C5ZV | Chassis name | Truck chassis (second) |
| Trademark name | JAC | manufacturer | Anhui JAC Motor Co.,Ltd |
| Tyre specification | 7.50R16LT 14PR,8.25R16LT 14PR | Tyre no. | 6 |
| approaching/departure angle(°) | 24/13 | | |
| Steel spring no. | 8/6+6 | Frong track(mm) | 1685 |
| Fuel type | diesel | Rear track (mm) | 1600 |
| Emission standard | Euro V | | |
| Engine model | manufacturer | displacement(ml) | power(Kw) |
| WP3Q130E50 | Weichai power yangzhou engine Co.,ltd | 2970 | 96 |
| function | <p>1□Can choose 240L□single bin□double bins□or 360L□660L□1100L standard bin lifting and turnover mechanism□can also choose ground hopper and other kinds of loading mechanism.</p> <p>2□With manual and automatic two sets of control method, the operator can control in the cabin, in the middle side or the back of the truck , very convenient and efficient.</p> <p>3□With working device of emergency braking stop button□</p> <p>4□Garbage body use frame design, elegant, strong structure, large effective capacity.</p> <p>5□Equipped with special collection box, sewage directly into the sewage tank in the process of compression, that is effectively prevent second pollution caused by sewage leaks.</p> <p>Through hydraulic system design, the truck achieve the function of two-way garbage compression, that is improve the compressibility ,make the compression ratio up to 1:2.5,the garbage can reach more then 600□800kg□m3 after compression.</p> | | |
