

The sewage suction tank truck is also called sewage truck, vacuum pump sewage truck, sewer vacuum truck, sewer tanker truck, vacuum sewage suction truck, sewage suction tanker truck, etc. It mainly used for suction, transportation and discharge of sewage from septic tank and sludge from drains. Widely used by municipal environment and sanitation department and residential management.

As a professional sewage truck manufacturer in China, the sewage tanker truck capacity is from 3000 liter to 16000 liters.

The septic tanker truck is with self-suction and self-unloading function. The tank can be lifted by

hydraulic cylinder to 45° and the rear door of the tank can also be open by hydraulic. So the sewage can be discharged from the tank completely. This is also convenient for you to maintenance and clean the tank.

Overfill system with music horn is equipped to prevent the vacuum pump damage from sewage

water into vacuum pump when the tank is full.

Super power of vacuum pump, seamless die casted steel cover, designing for container with high ability of pressure-resistance, double hydraulic jack system, more strength than cesspit emptier.

The suction depth of our vacuum tanker is more than 7 meter and sewage truck capacity is from 10000L to 16000 liters sewage truck is with double famous Weilong pump. It is high efficiency and manpower saved.
